We are living in an age of unprecedented change...Please join us for 2 days of assumption challenging training. With a group of like minded people we will learn how to build local Community Resilience.

The purpose of the Training is to give participants tools to navigate through the major challenges facing communities today such as peak oil, climate change, and the ongoing economic crisis. It is presented with a positive approach, focusing on ways we can create solutions in our communities that will lead to more fulfilling, equitable and socially connected lives.

It's up to us to create a more resilient and sustainable future for ourselves and for the generations to come.

*Transition is a social experiment on a massive scale*

If we wait for governments, it will be too little, too late.

If we act as individuals, it will be too little.

If we act as communities, it might just be enough, just in time.
